PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in AI/ML, software development, and cloud technologies, with hands-on experience building NLP, web, and data analytics projects. Built an AI-based Serious Injury & Fatality (SIF) detection system trained on 5,006 industrial safety reports and a student platform integrating 9 academic and career-focused features and modules. Skilled in Python, React.js, and machine learning pipelines, seeking a Software Engineering or AI/ML internship to apply problem-solving and development skills to real-world products.

EDUCATION

B.Tech in Computer Science and Engineering (AKTU) — ABES Engineering College

2024 – 2028 | CGPA: 1st Year – 8.8, 2nd Year – 7.5

Class XII, UP Board — RPIC School | 2023 | 91%

Class X, UP Board — RPIC School | 2021 | 95%

EXPERIENCE

Machine Learning & Applied AI Intern — BharatCares (AICTE IBM SkillsBuild Internship)

September 2026

- Completed a structured Machine Learning and Applied AI internship delivered through IBM SkillsBuild.
- Applied machine learning, AI, and data-driven problem-solving concepts through practical internship coursework.

PROJECTS

SANKET-X — AI/NLP-Based SIF Detection System

Python, NLP, Machine Learning, TF-IDF, Logistic Regression | 2026

- Developed an AI/NLP-based system to identify Serious Injury & Fatality (SIF) potential from free-text industrial safety reports.
- Implemented a TF-IDF and Logistic Regression pipeline to classify reports into SIF Potential and Non-SIF Potential categories.
- Processed and analyzed 5,006 safety reports covering unsafe acts, unsafe conditions, and near-miss incidents.

CampusOS — Smart College Management Platform

React.js, JavaScript, Firebase, HTML, CSS | 2026

- Built a centralized student platform covering academic management, career preparation, internships, and college resources.
- Implemented 6 core features, including Resume Builder, Internship Finder, Hackathon Hub, CGPA Calculator, Attendance Calculator, and Skill Tracker.
- Designed 3 dedicated modules for DSA Practice, Study Planning, and Placement Preparation, with AI Career Assistance.

AetherIQ — AI-Powered Business Intelligence Platform

React.js, Python, Firebase, Data Analytics | 2026

- Developed a cloud-based Business Intelligence platform integrating data analytics, AI insights, and predictive analytics.
- Implemented data-upload functionality supporting 2 structured dataset formats: CSV and Excel.
- Built interactive dashboards for structured-data visualization and business insight generation.

SKILLS

Languages: C, C++, Python, Java, JavaScript, SQL

Web Technologies: HTML5, CSS3, Tailwind CSS, React.js

Backend & Databases: Node.js, Express.js, Firebase, Firestore

AI/ML: Machine Learning, Natural Language Processing, TF-IDF, Logistic Regression

Cloud & Tools: AWS, Git, GitHub, VS Code

CERTIFICATIONS

AWS Academy Graduate – Cloud Foundations, Amazon Web Services (2025)
